- Tamilnadu District level karate

PROFESSIONAL PROJECT

walmart sales Data Analysis
EXCEL-MYSQL

- This project analyzes Walmart's sales data to uncover key insights into operations, focusing on top-performing branches, product lines, sales trends, and customer behavior. The analysis aims to optimize sales strategies.
- Identifying unique cities and branch locations.
- Evaluating product lines for diversity and revenue, including the top-selling product.
- Analyzing monthly revenue, COGS, and identifying peak periods.
- Assessing customer behavior by gender, type, and payment methods, and determining their impact on sales.
- Examining sales distribution by time and day, average customer ratings, and VAT impact across cities and products.
- These insights will guide data-driven decisions to improve Walmart's business performance.
